The Barrett 4075 high power HF Transmitter is a compact rack mounted communications solution developed for base station applications in large HF networks. It can be supplied in 1kW and 500 W versions. The transmitter comes as a complete package with an exciter, power supply, power amplifier, interconnecting cables and all required rack mount hardware.

The Barrett 4075 amplifier natively supports the Barrett 4050 Transceiver/Exciter which when coupled requires no further tuning or adjustment. A flexible I/O interface and analogue ALC feedback provide the transceiver/exciter full control over final output power. Intelligent electronic controls protect the 4075 from input and output overload while providing a sophisticated early warning and a diagnostic interface for system monitoring and event logging. Customisable auxiliary ports are also available for enhanced system control.

The 4075 system is field re-programmable via USB allowing the end user to update system software. An on-board micro SD card provides enhanced flexibility for display customisation and event logging.

The Barrett ISO9001 Quality Assurance Program ensures consistent performance and the highest reliability.

*Available Q1 2020
General Specifications

- **Frequency coverage**: 1.6MHz to 30MHz
- **Frequency stability**: ±0.5 ppm (±0.1 ppm optional) -30°C to +60°C (4050 Transceiver/Exciter)
- **Channel capacity**: 1000 with 4050 HF Transceiver
- **Modes**: J3E (USB, LSB) - H2B (AM) - J2A (CW) - (CF (Custom Filter) - ISB (data option))
- **Power output**: 1000W PEP or 500W PEP
- **Duty cycle**: 100%, Continuous PEP, CW
- **Exciter**: 4050 HF SDR transceiver

4075 Linear Amplifier Specifications

- **Power Output CW**: 1kW or 500W ± 1.5 dB
- **Power Gain**: +25 dB
- **Harmonics & Spurious**: Less than -55 dB
- **ALC Voltage (output)**: 0 ~ 10V
- **Filter Type**: 7 Band LPF
- **Dimensions**: 178H x 482W x 480D mm excluding handles and I/O connectors
- **Power Requirements**: 50V dc @ 60A, 24V dc @ 2.5 A max
- **Rack Height**: 5RU, 19” Rack mount (Amplifier and 50V power supply only)
- **Weight**: 35 kg (77 lbs)
- **Cooling**: Liquid cooled, Water, Propylene Glycol mixture
- **Temperature**: -20°C to +65°C operational, -40°C to +85°C storage
- **Humidity**: 95% relative, non condensing
- **Altitude**: 3000 m above sea level (not airborne), 9000m transportation
- **Input overdrive protection**: +6 dBm max
- **Output VSWR protection**: 3:1 nominal all magnitude and phases
- **Thermal Overload protection**: 85°C
- **Fault Log**: System events and error reporting
- **Standards**: Designed to meet or exceed:
  - FCC/IC/ETS#
  - CE#
  - Australia/New Zealand AS/NZS 4770 2000 and AS/NZS 4582:1999

Specifications are typical. Equipment descriptions and specifications are subject to change without notice or obligation.

# Approval pending

**Typical 4075 High power 1 kW HF transmitter example**

1. Barrett 4075 Power distribution unit
2. Barrett 4050 SDR HF transceiver exciter
3. Barrett 4022 24V Power supply
4. Barrett 4075 48V Power supply
5. Barrett 4075 Linear amplifier

The Barrett 4075 High power 1kW HF transmitter package is installed into either a 20U P/N BC407510 or 39U P/N BC407510 rack unit with a depth of 700 mm.

The Barrett 4075 High power 500W HF transmitter package is installed into a 20U rack unit with a depth of 700 mm P/N BC407512.

The packages ship as a complete unit including 19’ rack mounting kits and blanking plates and all necessary cables and hardware ready for operation.
