

BARRETT 2050

Advanced HF SSB Transceiver

BCA91202 NVIS Kit

The Barrett Near Vertical Incidence Skywave (NVIS) kit is designed to enhance the short range communications efficiency of the Barrett 912 Multi-Wire Broadband Dipole Antenna System

The NVIS kit comprises a high quality stainless steel open wire feeder assembly allowing the antennas matching balun to be mounted close to ground. With the Barrett 912 antenna installed in the horizontal configuration, between two masts, higher take off angles and radiation efficiency are achieved, improving communications paths over the range 20 - 500 km, particularly in hilly and mountainous terrain.

The BCA91202 NVIS kit can be quickly and easily installed without the need for any special tools
